

The Gnome's Speech -

Dear Otto and Manda, dear assembled guests,

As part of the German branch of the family we have brought you a gift. A so-called Garden

Gnome. You know, lots of Germans have garden-gnomes in their gardens.

This special gnome has a ball of glass in his hands. Inside the ball is a solar light. So the

gnome shall be a symbol of green energy. As you know, in this time this is the Big Deal

between Germany and Namibia: Green Energy.

This big deal – out of all places – will take place in Lüderitz. The place, where the first so

called “Schutzvertrag” (protection treaty) was signed. And now there are new treaties between

Namibia and Germany about Green Hydrogene.

We, as family, recommend you, to read carefully the small print of this treaty. Be sure, that

your interests are taken care off. Mistrust the German politicians and the Western Capitalists,

who only think on their profit.

Remember that there were treaties between Germany and today

Namibia more than 100 years

ago. We all know, that this was the beginning of German Colonialism.

So, please, don't allow Germany – economicly this time – to colonize you again!

Ursula Trüper
